

Applicant's Remarks and Arguments

Objection 1(c) Others

Continuation of 1(c) Other: According to 37 CFR 1.125 a substitute specification submitted under this section must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record, therefore, the response on page 3 is not in compliance.

Response:

Applicant has already submitted the proper response to this objection. In the correspondence dated 04/04/2005 under the heading Claims, Applicant filed the claims from page number 7 to page 27, reflecting the modified claims clearly shown as underlined claims.

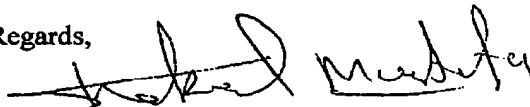

Objection

Continuation of 3(c) Other: The drawings submitted 04 April 2005 does not indicate changes with respect to the following reference characters: 67, 71, 73, 91, 93, 95, 97, 110, 111, 150, 180, 190, 309, 320, 321, 430, 435, 505, 510, 555, 820, 825, 830, 840, 883, 887, and 889. Corrected drawing sheets in compliance with 37 CFR 1.121(d) or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121 (b) are required in reply to the Office Action to avoid abandonment of the application.

Response:

Applicant has already sent the updated pages of documents and the corresponding drawings clearly showing the correct reference to all of the above reference characters. These communication were sent on 04/03/2005 under the heading **Applicant Arguments or Remarks Made in an Amendment**. Also, the drawings sent on 04/04/2005 under the heading **Drawings** reflect the correct use of the above reference. These two references properly contain the clear indications of the reference used both in drawings and in the documents as well. This objection was raised in the original communication of the Examiner objection 09/08/2005 in the Non-Final Rejection Action. Applicant would like to invite the Examiner to point out the reference characters which she believes are not in the material sent on the above dates. The Applicant properly addressed this issue in the above cited communications.
